INTRODUCTION

This bulletin contains the analyses, together with the guarantees and names of all samples of fertilizer, feed, and agricultural liming material collected from the Maryland market from January 1 to July 1, 1936. There is also included for the reader's information all definitions for feeding materials which have been adopted thus far by the Association of American Feed Control Officials. Mineral feed analyses, the results of dog food examinations, and cod liver oil assays are recent additions to the bulletin. In every locality in this State where fertilizers, feeds, and limes are sold, one or more of the brands listed may be obtained. This publication then may well act as a guide in helping the prospective purchaser select that commodity best suited to his needs. In all such purchasing it must be borne in mind that compliance by the manufacturer with all guarantees and warranties on the label does not always indicate the quality of the material. The State Inspection Service cannot prevent the sale of a product if it is licensed and properly labeled and sold in accordance with regulatory laws. It is therefore highly important for the purchaser to use his judgment and be influenced more by merit and quality, than by price, when making a selection.

FERTILIZER ANALYSES

A detailed table showing results obtained in the examination of fertilizers from January 1, to July 1, 1936, is given on pages 6 to 35, inclusive.

When submitting applications for the registration of fertilizers, manufacturers are required to state the percentage of mineral and the percentage of organic nitrogen contained in each product. Each mixed fertilizer is chemically examined for these two forms of nitrogen and reports included herein. The following tolerances or variations from manufacturers' statements have been adopted by this Department.

Mixed fertilizers containing two per cent of nitrogen or less were allowed a tolerance of one-fourth of one per cent.

Mixed fertilizers containing three per cent of nitrogen a tolerance of one-third of one per cent.

Mixed fertilizers containing four per cent or more of nitrogen, one-half of one per cent.

All mixed goods exceeding these tolerances carry the statement, "Mineral and organic findings do not substantiate manufacturer's declaration."

DEFINITIONS OF FEEDINGSTUFFS

The following definitions for feedingstuffs have been adopted by the Association of American Feed Control Officials, Inc., at various times, and include the definitions adopted at the meeting of the Association held November 14 and 15, 1935, at Washington, D. C.

ALFALFA PRODUCTS

1. **Chopped Alfalfa** is the entire alfalfa hay, chopped and not ground finely enough to become a meal. It must not contain an admixture of alfalfa straw or other foreign material. (Adopted prior to 1928).

2. **Alfalfa Meal** is the product obtained from the grinding of the entire alfalfa hay, without the addition of any alfalfa stems, alfalfa straw or foreign material, or the abstraction of leaves. It must be reasonably free from other crop plants and weeds, and must not contain more than 33 per cent of crude fibre. (Adopted 1928).

3. **Alfalfa Leaf Meal** is the ground product consisting chiefly of leafy materials separated from alfalfa hay. It must be reasonably free from other crop plants and weeds, and must not contain more than 18 per cent of crude fibre. (Adopted 1928).

4. **Alfalfa Stem Meal** is the ground product remaining after the separation of the leafy material from alfalfa hay or meal. It must be reasonably free from other crop plants and weeds. (Adopted 1928).

ANIMAL PRODUCTS

5. **Blood Meal** is ground, dried blood. (Adopted 1926).

6. **Blood Flour** is dried blood, prepared by special processes and reduced to a fine powder. (Adopted prior to 1928).

7. **Digester Tankage, Meat Meal Tankage or Feeding Tankage** is the residue from animal tissues exclusive of hoof, horn, manure and stomach contents, except in such traces as might occur unavoidably in good factory practice, especially prepared for feeding purposes by tanking under live steam or by dry rendering or a mixture of the products made suitable by drying and grinding. It must not contain more than 10 per cent of phosphoric acid (expressed as P_2O_5). If it bears a name descriptive of its kind, composition or origin, the material must correspond thereto. (Adopted 1928—Amended 1933).

8. **Digester Tankage with Bone, Meat and Bone Meal Digester Tankage, Meat and Bone Meal Tankage, or Feeding Tankage with Bone** is the residue from animal tissues exclusive of hoof, horn, manure and stomach contents, except in such traces as might occur unavoidably in good factory practice, especially prepared for feeding purposes by tanking under live steam or by dry rendering or a mixture of the products made suitable by drying and grinding, and containing more than 10 per cent of phosphoric acid (expressed as P_2O_5). If it bears a name descriptive of its kind, composition or origin, it must correspond thereto. (Adopted 1928—Amended 1933).

9. **Meat Scraps** is the ground dry-rendered residue from animal tissues exclusive of hoof, horn, manure and stomach contents, except in such traces as might occur unavoidably in good factory practice. When this product contains more than 10 per cent of phosphoric acid (expressed as P_2O_5), it shall be designated Meat and Bone Scrap. If it bears a name

descriptive of its kind, composition or origin it must correspond thereto. (Adopted 1928).

10. **Raw Bone Meal** is the dried, ground product, suitable for animal feeding, obtained by cooking in water at atmospheric pressure, undecomposed bone, just enough to remove excess fat and meat. It must not contain less than 23 per cent of protein. (Adopted 1929).

11. **Steamed Bone Meal** is the dried, ground product suitable for animal feeding, obtained by cooking bones with steam under pressure. (Adopted 1929).

12. **Special Steamed Bone Meal** is the dried, ground product suitable for animal feeding, obtained by cooking dried bone after the removal of grease and meat fibre with steam under pressure in the process of obtaining gelatine or glue. (Adopted 1929).

APPLE PRODUCTS

13. **Dried Apple Pomace** is the sound, dried residue obtained by the removal of cider from apples. (Adopted 1929).

14. **Dried Apple Pectin Pulp** is the sound, dried residue obtained by the removal of pectin from apple products. (Adopted 1929).

BARLEY PRODUCTS

15. **Barley Hulls** is the product consisting of the outer coverings of the barley. (Adopted prior to 1928).

16. **Barley Feed** is the entire by-product resulting from the manufacture of pearl barley from clean barley. (Adopted prior to 1928).

17. **Barley Mixed Feed** is the entire offal from the milling of barley flour from clean barley and is composed of barley hulls and barley midlings. (Adopted prior to 1928).

18. **Ground Barley** is the entire product obtained by grinding clean sound barley, containing not less than 90 per cent of pure barley and not more than 10 per cent of other grains, weed seeds and other foreign material and not more than 6 per cent of crude fibre; provided that no portion of this stated 10 per cent of other grains, weed seeds or other foreign material shall be intentionally added. (Adopted prior to 1928).

19. **Mixed Feed Barley** is the entire product obtained by grinding country run barley containing not less than 75 per cent of pure barley and not more than 25 per cent of other grains, weed seeds and other foreign material; provided that no portion of this stated 25 per cent of other grains, weed seeds or foreign material shall be intentionally added. The ingredients must be stated as barley, other grains, weed seeds and foreign material. (Adopted prior to 1928).

BEET PRODUCTS

20. **Dried Beet Pulp** is the dried residue from sugar beets which have been cleaned and freed from crowns, leaves and sand, and from which the sugar has been extracted. (Adopted prior to 1928).

BREWERS' AND DISTILLERS' PRODUCTS

21. **Brewers' Dried Grains** is the dried residue obtained in the manufacture of beer. (Adopted prior to 1928).

22. **Distillers' Corn Dried Grains or Distillers' Rye Dried Grains** is the dried residue obtained in the manufacture of alcohol and distilled

liquors. The product must bear the designation indicating the cereal predominating. (Adopted prior to 1928).

23. **Distillers' Corn Solubles** is a by-product from the manufacture of alcohol from corn solids obtained by the evaporation of the mash liquor after the removal of the alcohol and wet grains. (Adopted prior to 1928).

24. **Distillers' Rye Solubles** is a by-product from the manufacture of alcohol from rye solids obtained by the evaporation of mash liquor after the removal of the alcohol and wet grains. (Adopted prior to 1928).

25. **Distillers' Corn and Rye Solubles** is a by-product from the manufacture of alcohol from corn and rye solids obtained by the evaporation of mash liquor after the removal of the alcohol and wet grains. (Adopted prior to 1928).

26. **Malt Sprouts** are the sprouts of the barley grain obtained from malted barley. Sprouts derived from any other malted cereal must be designated by the name of that cereal. (Adopted prior to 1928).

27. **Yeast Dried Grains or Vinegar Dried Grains** is the properly dried residue from the mixture of cereals, malt and malt sprouts (sometimes cottonseed meal) obtained in the manufacture of yeast or vinegar, and consists of corn or corn and rye from which most of the starch has been extracted, together with malt added during the manufacturing process to change the starch to sugars, and malt sprouts (sometimes cottonseed meal) added during the manufacturing process to aid in filtering the residue from the wort and to serve as a source of food supply for the yeast. (Adopted prior to 1928).

BUCKWHEAT PRODUCTS

28. **Buckwheat Shorts or Buckwheat Middlings** are the portion of the buckwheat grain immediately inside the hull secured after separation from the flour. (Adopted prior to 1928).

CHOP

29. **Chop** is a ground or chopped feed composed of one or more different cereals or by-products thereof. If it bears a name descriptive of the kind of cereals, it must be made exclusively of the entire grains of those cereals. (Adopted prior to 1928).

COCOANUT PRODUCTS

30. Per Cent Protein Coconut Oil Meal or.....Per Cent Protein Copra Oil Meal is the ground residue from the extraction of part of the oil from the dried meat of the coconut. (Adopted prior to 1928).

CORN PRODUCTS

31. **Corn Meal** is finely ground, unbolted corn. (Adopted prior to 1928).

32. **Corn Bran** is the outer coating of the corn kernel, with little or none of the starchy part or germ. (Adopted 1931).

33. **Corn Feed Meal** is the fine siftings obtained in the manufacture of screened corn chop, screened ground corn or screened cracked corn, with or without its aspiration products added. (Adopted 1931).

34. **Corn Chop, Ground Corn or Cracked Corn** is the entire product made by grinding, cutting or chopping the grains of sound Indian corn, and may be fine, medium or coarse, and must not contain more than four per cent of foreign material. (Adopted 1931).

35. **Screened Corn Chop, Screened Ground Corn, or Screened Cracked Corn** is the coarse portion of corn chop, ground corn or cracked corn from which most of the fine particles have been removed, and must not contain more than 4 per cent of foreign material. (Adopted 1931).

36. **Corn Grits or Hominy Grits** is the product consisting of the fine or medium sized, hard flinty portions of sound Indian corn containing little or none of the bran or germ. (Adopted 1931).

37. **Ear Corn Chops** is corn and cob chopped, without the husk, with no greater proportion of cob than occurs in the ear corn in its natural state. (Adopted prior to 1928).

38. **Corn Gluten Meal** is that part of commercial shelled corn that remains after the separation of the larger part of the starch, the germ and the bran, by the processes employed in the manufacture of corn starch. It may or may not contain corn solubles. (Adopted prior to 1928).

39. **Corn Gluten Feed** is that part of commercial shelled corn that remains after the separation of the larger part of the starch and the germs by the processes employed in the manufacture of corn starch. It may or may not contain corn solubles. (Adopted prior to 1928).

40. **Maltose Process Corn Gluten Feed** is the dried residue from degermed corn, after removal of the starch in the manufacture of malt syrup. (Adopted prior to 1928).

41. **Hominy Feed** is a mixture of corn bran, corn germ and a part of the starchy portion of either white or yellow corn kernels or mixture thereof as produced in the manufacture of pearl hominy, hominy grits or table meal, and shall contain not less than 5 per cent of crude fat. If prefixed with the words "white" or "yellow," the product must correspond thereto. (Adopted 1935).

42. **Corn Oil Cake** consists of the corn germ from which part of the oil has been pressed and is the product obtained in the wet milling process of manufacture of corn starch, corn syrup, and other corn products. (Adopted prior to 1928).

43. **Corn Oil Meal** is ground corn oil cake. (Adopted prior to 1928).

44. **Corn Germ Cake** consists of corn germ with other parts of the corn kernel from which part of the oil has been pressed, and is the product obtained in the dry milling process of manufacture of corn meal, corn grits, hominy feed, and other corn products. (Adopted prior to 1928).

45. **Corn Germ Meal** is ground corn germ cake. (Adopted prior to 1928).

46. **Corn Screenings** is the product consisting of the small light grains of corn, parts of grains of corn and/or other cereals, and other materials having feeding value, obtained by screening shelled corn, excluding sand, dirt and other similar inert materials. (Adopted 1931).

COTTONSEED PRODUCTS

47. **Cottonseed Meal** is a product of the cottonseed only, composed principally of the kernel with such portion of the hull as is necessary in the manufacture of oil; provided that nothing shall be recognized as cottonseed meal that does not conform to the foregoing definition and that does not contain at least 36 per cent of protein. Cottonseed meal shall be graded and classified as follows: (Adopted prior to 1928).

48. **Per Cent Protein Cottonseed Meal, Prime Quality.** Cottonseed meal, prime quality, must be finely ground, not necessarily bolted, of sweet odor, reasonably bright in color, yellowish, not brown or red-

dish, free from excessive lint, and shall contain not less than 36 per cent of protein. It must be designated and sold according to its protein content. Cottonseed meal with 36 per cent of protein must be termed "36 per cent Protein Cottonseed Meal, Prime Quality," and higher grades similarly designated (as "43 per cent Protein Cottonseed Meal, Prime Quality"), etc. (Adopted prior to 1928).

49. Per Cent Protein Cottonseed Meal, Off Quality. Cottonseed meal not fulfilling the above requirement as to color, odor and texture must be graded "36 per cent Protein Cottonseed Meal, Off Quality," and higher grades similarly designated. (Adopted prior to 1928).

50. Cottonseed Feed is a mixture of cottonseed meal and cottonseed hulls, containing less than 36 per cent of protein. (Adopted prior to 1928).

51. Per Cent Protein Whole Pressed Cottonseed, Prime Quality is the product resulting from subjecting the whole, sound, mature, clean undecorticated cottonseed to pressure for the extraction of oil, and includes the entire cottonseed less the oil extracted and the lint removed. It must be designated and sold according to its protein content. (Adopted 1932).

52. Per Cent Protein Ground Whole Pressed Cottonseed, Prime Quality is whole pressed cottonseed, ground. It must be designated and sold according to its protein content. (Adopted 1932).

GARBAGE

53. Processed Garbage is composed of dried animal and vegetable waste from garbage collected sufficiently often that harmful decomposition has not set in, and separated from material such as crockery and glass. Its odor must not be suggestive of the presence of decomposition and it must contain less than one per cent of glass. None of it shall contain knife-like or needle-like particles, and the maximum percentage of glass should be stated on the label when present in excess of one-fifth of one per cent. (Adopted prior to 1928).

IVORY NUT PRODUCTS

54. Ivory Nut Meal is the ground waste material resulting from the manufacture of buttons and similar articles from the vegetable ivory nut. (Adopted prior to 1928).

LINSEED AND FLAX PRODUCTS

55. Per Cent Protein Linseed Cake or Linseed Meal is the product obtained in the removal of the oil from flaxseed; provided that the final product contains less than 6 per cent of weed seeds and other foreign materials; and provided, further, that no portion of the stated 6 per cent of weed seeds and other foreign materials shall be deliberately added. It shall not contain more than 0.5 per cent of acid insoluble ash. (Adopted 1933).

56. Per cent Protein Old Process Oil Meal or Per Cent Protein Old Process Linseed Meal is oil meal as defined below, produced by crushing, cooking and hydraulic pressure. (Adopted prior to 1928).

57. Per Cent Protein New Process Oil Meal or Per Cent Protein New Process Linseed Meal is oil meal as defined below, produced by crushing, heating and the use of solvents. (Adopted prior to 1928).

58. Flax Plant By-Products is that portion of the flax plant remaining after the separation of the seed, the bast fibre and a portion of the shives, and consists of flax shives, flax pods, broken and immature flax seeds, and the cortical tissues of the stem. (Adopted prior to 1928).

59. **Ground Flaxseed or Flaxseed Meal** is the product obtained by grinding flaxseed which has been screened and cleaned of weed seeds and other foreign materials by the most improved commercial process; the final product must contain less than 4 per cent of weed seeds and other foreign materials, and no portion of the stated 4 per cent of weed seeds and other foreign materials shall be intentionally added. (Adopted prior to 1928).

60. **Unscreened Flaxseed Oil Feed Cake** is the product obtained by extraction of part of the oil from unscreened flaxseed by crushing, cooking and hydraulic pressure, or by crushing, heating and the use of solvents. The ingredients must be stated as "partially extracted flaxseed and foreign seeds (wheat, wild buckwheat, pigeon grass, wild mustard, etc.)." (Adopted prior to 1928).

61. **Ground Unscreened Flaxseed Oil Feed** is the ground unscreened flaxseed oil feed cake. (Adopted prior to 1928).

62. **Screenings Oil Feed** is the ground product obtained after extraction of part of the oil by crushing, cooking and hydraulic pressure, or by crushing, heating and the use of solvents from the smaller imperfect flaxseed, weed seeds and other foreign materials having feeding value, separated in cleaning flaxseed. The name of the grain from which the screenings are separated must be prefixed to "screenings oil feed." (Adopted prior to 1928).

63. **Per Cent Protein Oil Cake** is the product obtained after the extraction of part of the oil by crushing, cooking and hydraulic pressure, or by crushing, heating and the use of solvents, from flaxseed which has been screened and cleaned of weedseeds and other foreign materials by the most improved commercial process. When used alone the term "Oil Cake" shall be understood to designate linseed cake as defined. When used to cover any other product the name of the seed from which it is obtained must be prefixed to the words "Oil Cake." (Adopted prior to 1928).

64. **Per Cent Protein Oil Meal or Per Cent Protein Ground Oil Cake** is oil cake ground to a meal. (Adopted prior to 1928).

MARINE PRODUCTS

65. **Fish Meal** is clean, dried, ground tissues of undecomposed whole fish and/or fish cuttings with or without the extraction of part of the oil, and contains not more than 3 per cent of salt (NaCl). If it contains more than 3 per cent of salt (NaCl) the amount of salt must constitute a part of the brand name, provided that in no case shall the salt content of this product exceed 7 per cent. (Adopted 1933).

66. **Fish Residue Meal** is the clean, dried, undecomposed residue from the manufacture of glue from non-oily fish, and contains not more than 3 per cent of salt (NaCl). If it contains more than 3 per cent of salt (NaCl) the amount of salt must constitute a part of the brand name, provided that in no case shall the salt content of this product exceed 7 per cent. (Adopted 1933).

67. **Crab Meal** is prepared from the undecomposed dried waste of the crab industry and contains the shell, viscera and part or all of the flesh. It contains not less than 25 per cent of protein and not more than 3 per cent of salt (NaCl). If it contains more than 3 per cent of salt (NaCl) the amount of salt must constitute a part of the brand name, provided that in no case shall the salt content of this product exceed 7 per cent. (Adopted 1933).

68. **Shrimp Meal** is prepared from the undecomposed dried waste of the shrimp industry and contains the head, hull and/or the whole shrimp and not more than 3 per cent of salt (NaCl). If it contains more than

3 per cent of salt (NaCl) the amount of salt must constitute a part of the brand name, provided that in no case shall the salt content of this product exceed 7 per cent. (Adopted 1933).

69. **Whale Meal** is prepared from the clean, dried, undecomposed flesh of the whale, after part of the oil has been extracted. It contains not more than 3 per cent of salt (NaCl). If it contains more than 3 per cent of salt (NaCl) the amount of salt must constitute a part of the brand name, provided that in no case shall the salt content of this product exceed 7 per cent. (Adopted 1933).

70. **Cod Liver Oil** is the product obtained by extraction of part of the oil from cod livers. (Adopted 1932).

71. **Sardine Oil or Pilchard Oil** is the product obtained by extraction of part of the oil from the whole Pacific sardine or pilchard or from cannery refuse of this species of fish. (Adopted 1932).

72. **Salmon Oil** is the product obtained by extraction of part of the oil from the cannery refuse of salmon. (Adopted 1932).

73. **Tuna Oil** is the product obtained by extraction of part of the oil from the cannery refuse of tuna. (Adopted 1932).

74. **Menhaden Oil** is the product obtained by extraction of part of the oil from whole menhaden. (Adopted 1932).

75. **Herring Oil** is the product obtained by extraction of part of the oil from the whole herring or part of the herring. (Adopted 1933).

76. **Salmon Liver Oil** is the product obtained by extraction of part of the oil from salmon livers. (Adopted 1933).

77. **Stearine** is the solid material obtained by filtration from an animal or vegetable oil after chilling or freezing in the process of refining. When this product is sold as a feed, the term shall be prefixed by the name of the oil from which it is obtained. (Adopted 1934).

MILK PRODUCTS

78. **Dried Buttermilk** is the product resulting from the removal of water from clean, sound buttermilk derived from natural cream to which no foreign substances have been added, excepting such as are necessary and permitted in the manufacture of butter. It contains not more than 8 per cent of moisture, not more than 13 per cent of mineral matter (ash), and not less than 5 per cent of butterfat, as determined by the Roese-Gottlieb method. (Adopted 1932).

79. **Evaporated Buttermilk, Concentrated Buttermilk or Condensed Buttermilk** is the product resulting from the removal of a considerable portion of water from clean, sound buttermilk derived from natural cream to which no foreign substances have been added excepting such as are permitted and necessary in the manufacture of butter. It contains not less than 27 per cent of total solids, not less than 2 per cent of butterfat, and not more than .14 per cent of ash for each per cent of solids. This definition does not prohibit the use of a distinctive trade name, provided it is followed by one of the names given. (Adopted prior to 1928).

80. **Dried Skimmed Milk** is the product resulting from the removal of water from clean, sound skimmed milk. It contains not more than 8 per cent of moisture. (Adopted 1930).

81. **Dried Soured Skimmed Milk** is the product resulting from the removal of water from clean, sound skimmed milk which has been soured by a suitable culture of lactic bacteria. It contains not more than 8 per cent of moisture. (Adopted 1932).

82. **Evaporated Soured Skimmed Milk, Concentrated Soured Skimmed Milk or Condensed Soured Skimmed Milk** is the product resulting from the removal of a considerable portion of water from clean, sound skimmed milk which has been soured by a suitable culture of lactic bacteria. It contains not less than 27 per cent of total solids. (Adopted 1932).

83. **Condensed Skimmed Milk** is the product resulting from the removal of a considerable portion of water from clean, sound skimmed milk. It contains not less than 27 per cent of total solids. (Adopted 1930).

84. **Milk Sugar Feed or Dried Whey** is the by-product from the manufacture of cheese and should contain at least 70 per cent of lactose (milk sugar). (Adopted 1932).

85. **Dried Whey** is the by-product from the manufacture of cheese and/or casein. This product shall contain at least 65 per cent of lactose (milk sugar). (Adopted 1934).

86. **Cheese Rind** is cooked, partially defatted cheese rind. (Adopted 1935).

MINERAL FEEDS

87. Mixed feeds containing both feed and more than 5 per cent of mineral ingredients require, in addition to the usual declaration of the chemical feed analysis, a declaration of each ingredient contained therein and the minimum percentages of lime expressed as CaO , phosphoric acid expressed as P_2O_5 , iodine (I), and the maximum percentage of salt (NaCl) if same be present. If minerals predominate in the mixture, the usual declaration of the chemical feed analysis, with the exception of protein, may be omitted.

In mineral feeds containing no organic ingredient, the usual chemical feed guarantee need not be made. A declaration should be made of each ingredient contained therein and the minimum percentage of lime expressed as CaO , phosphoric acid expressed as P_2O_5 , iodine (I), and the maximum percentage of salt (NaCl) if same be present.

The mineral ingredients should be stated in the common English terms, if any such terms exist.

It being impossible to classify separately the drug ingredients and the mineral ingredients, be it resolved:

(a) That all mixtures containing mineral ingredients generally regarded as dietary factors essential for the normal nutrition of animals and which are sold or represented for the primary purpose of supplying these minerals as additions to rations in which these same mineral factors may be deficient, be classified as mineral feeds.

(b) That all other preparations which are sold or represented primarily for the cure, mitigation or prevention of disease be classified by this Association as drugs, medicines or specifics. (Adopted prior to 1928).

MINERAL FEEDS

(NOTE)—This change is to become effective not later than January 1, 1937.

88. Mixed feeds containing both feed and more than 5 per cent of mineral ingredients require, in addition to the usual declaration of the chemical feed analysis, a declaration of each ingredient contained therein and the minimum percentages of calcium (Ca), phosphorus (P), iodine (I), and the maximum percentage of salt (NaCl) if same be present. If minerals predominate in the mixture, the usual declaration of the chemical feed analysis, with the exception of protein, may be omitted.

In mineral feeds for which no nutritional properties other than those of a mineral nature are claimed, the usual chemical guarantees need not be declared. A declaration should be made of each ingredient contained therein and the minimum percentage of calcium (Ca), phosphorus (P), iodine (I), and the maximum percentage of salt (NaCl) if same be present.

The mineral ingredients should be stated in the common English terms, if any such terms exist.

It being impossible to classify separately the drug ingredients and the mineral ingredients, be it resolved:

(a) That all mixtures containing mineral ingredients generally regarded as dietary factors essential for the normal nutrition of animals and which are sold or represented for the primary purpose of supplying these minerals as additions to rations in which these same mineral factors may be deficient, be classified as mineral feeds.

(b) That all other preparations which are sold or represented primarily for the cure, mitigation or prevention of disease be classified by this Association as drugs, medicines or specifics. (Adopted 1935).

OAT PRODUCTS

89. **Oat Hulls** is the product consisting of the outer covering of the oat. (Adopted prior to 1928).

90. **Oat Middlings** is the product consisting of the floury portions of the oat groat obtained in the milling of rolled oats. (Adopted prior to 1928).

91. **Oat Shorts** is the product consisting of the covering of the oat grain lying immediately inside the hull, being a fuzzy material carrying with it considerable portions of the fine floury part of the groat obtained in the milling of rolled oats. (Adopted prior to 1928).

92. **Oat Chop, Ground Oats, Pulverized Oats, Crushed Oats, or Crimped Oats** consists of the entire product made by chopping, cutting, grinding, crushing, or crimping whole oats. (Adopted 1931).

93. **Oat Groats** are the kernels produced from cleaned and dried oats in the process of manufacturing oat meal. (Adopted 1931).

94. **Hulled Oats, or Undried Oat Groats** are the kernels produced from the undried grain in the process of hulling oats. (Adopted 1931).

95. **Oat Meal, or Ground Oat Groats** is the product produced by cutting, cracking or grinding oat groats. (Adopted 1931).

96. **Rolled Oat Groats or Rolled Oats** is the product obtained in the process of rolling oat groats. (Adopted 1931).

97. **Clipped Oat By-Products** is the by-product obtained in the manufacture of clipped oats. It may contain the light chaffy material broken from the end of the hulls, empty hulls, light immature oats and dust. It must not contain an excessive amount of oat hulls. (Adopted prior to 1928).

98. **Oat Mill Feed (Oat Hulls, Oat Shorts and Oat Middlings)** is the entire by-product produced in the manufacture of oat groats and consists of oat hulls, oat shorts and oat middlings. If used in a mixed feed, it shall be called Oat Mill Feed (Oat Hulls, Oat Shorts and Oat Middlings. (Adopted 1932).

PALM PRODUCTS

99. **Palm Kernel Oil Meal** is the ground residue from the extraction of part of the oil by pressure or solvents from the kernel of the fruit of *Elaeis guineensis* or *Elaeis molanococco*. (Adopted prior to 1928).

PEANUT PRODUCTS

100. **Per Cent Protein Peanut Oil Cake** is the residue after the extraction of part of the oil by pressure or solvents from peanut kernels. (Adopted prior to 1928).

101. **Per Cent Protein Peanut Oil Meal** is ground peanut oil cake. (Adopted prior to 1928).

102. **Unhulled Peanut Oil Feed** is the ground residue obtained after extraction of part of the oil from whole peanuts, and the ingredients must be designated as **Peanut Meal and Hulls**. (Adopted prior to 1928).

RICE PRODUCTS

103. **Rice Bran** is the pericarp or bran layer of the rice, with only such quantity of hull fragments as is unavoidable in the regular milling of rice. (Adopted prior to 1928).

104. **Rice Hulls** is the product consisting of the outer coverings of the rice. (Adopted prior to 1928).

105. **Rice Polish** is the finely powdered material obtained in polishing the kernel. (Adopted prior to 1928).

106. **Rice Meal** is ground brown rice or ground rice after the hull has been removed. (Adopted prior to 1928).

107. **Ground Rough Rice** is ground rice from which the hull has not been removed or ground paddy rice. (Adopted prior to 1928).

108. **Rice Stone Bran** is the siftings from the materials secured in removing hulls from rice and contains rice germs, broken rice and some rice hulls. (Adopted prior to 1928).

109. **Rice Huller Bran** is a product secured by the huller and cones from brown rice and consist mostly of the bran and germs. (Adopted prior to 1928).

RYE PRODUCTS

110. **Rye Bran** is the coarse outer covering of the rye kernel as separated from the cleaned and scoured rye. (Adopted prior to 1928).

111. **Rye Feed** is a by-product obtained in the usual process of the milling of rye flour from cleaned and scoured rye grain, consisting principally of the mill-run of the outer covering of the rye grain and the germ with small quantities of flour and aleurone. (Adopted prior to 1928).

112. **Rye Red Dog** is a by-product obtained in the usual process of the milling of rye flour, consisting principally of aleurone with small quantities of flour and fine bran particles and must not contain more than 3.5 per cent of crude fibre. (Adopted prior to 1928).

113. **Rye Low-Grade Feed Flour** consists principally of dark rye flour and small quantities of aleurone and fine bran particles and must not contain more than 1.5 per cent of crude fibre. (Adopted prior to 1928).

114. **Rye Middlings** consists of rye feed and rye red dog combined in the proportions obtained in the usual process of milling rye flour. (Adopted prior to 1928).

115. **Rye Flour Middlings** consist of rye feed, rye red dog and pure dark rye flour combined in the proportions obtained in the milling of rye flour and must not contain more than 5 per cent of crude fibre. (Adopted prior to 1928).

SCREENINGS

116. **Screenings** consist of a mixture of mill or elevator run materials or a combination of varying amounts of materials obtained in the process of cleaning grain and/or seed, such as inferior, light or broken grain or seed, weed seeds, hulls, chaff, joints, straw, elevator dust, floor sweepings. They must be relatively free of unpalatable or injurious weed seeds, sand and dirt. They must not contain more than 14 per cent of fibre or more than 6.50 per cent of ash. If they bear a name descriptive of their kind or origin, they must correspond thereto. (Adopted 1935).

117. **Screenings—Grain** consist of inferior, light or broken grain and/or seed obtained in the process of cleaning grain or seed or recleaning screenings. They must be relatively free of weed seeds, chaff, straw, hulls, joints, sand and dirt, and other foreign materials. If they bear a name descriptive of their kind or origin, they must correspond thereto. (Adopted 1935).

118. **Screenings Waste or Screenings Refuse** is a mixture of materials of little or no feeding value, or injurious as a feed, obtained in the process of cleaning grain and/or seed, or recleaning screenings, such as weed seeds which may be unpalatable or injurious, chaff, hulls, straw, sticks, joints, elevator dust, floor sweepings, sand and dirt. (Adopted 1935).

119. **Scourings** consist of such portions of the cuticle, brush, white caps, dust, smut and other materials as are separated from the grain in the usual commercial process of scouring. (Adopted prior to 1928).

(NOTE)—If to any of the wheat or rye by-product feeds there should be added screenings or scourings—as above defined, either ground or unground, bolted or unbolted, such brand shall be so registered, labeled and sold as clearly to indicate this fact. The word "Screenings," or "Scourings," as the case may be, shall appear as part of the name or brand and shall be printed the same size and face of type as the remainder of the brand name. When the word "Screenings" appears it is not necessary to show also on the labeling the word "Scourings." (Adopted prior to 1928).

SORGHUM PRODUCTS

120. **Head Chops** is the product consisting of the entire heads of the grain sorghums chopped, and should bear the name of the sorghum from which it is made. This includes, among others, kaffir head chops, milo head chops, feterita head chops, and sorghum head chops. (Adopted prior to 1928).

121. **Head Stems** is the product consisting of the stems from the heads of the grain sorghums after the grain has been removed, and should bear the name of the sorghum from which it is made. (Adopted prior to 1928).

SOYBEAN PRODUCTS

122. **Ground Soybeans** is the product obtained by grinding whole soybeans without cooking or removing any of the oil. (Adopted 1933).

123. **Per Cent Protein Soybean Oil Cake or Soybean Oil Chips** is the product obtained by crushing, cooking and removing part of the oil from soybeans. (Adopted 1933).

124. **Per Cent Protein Soybean Oil Meal** is ground soybean oil cake or ground soybean oil chips. (Adopted 1933).

VELVET BEAN PRODUCTS

125. **Velvet Bean Meal** is ground velvet beans containing only an unavoidable trace of hulls or pods. (Adopted prior to 1928).

126. **Ground Velvet Bean and Pod** is the product derived by grinding velvet beans with the pod. It contains no additional pods or other materials. (Adopted prior to 1928).

WHEAT PRODUCTS

127. **Wheat Bran** is the coarse outer covering of the wheat kernel as separated from cleaned and scoured wheat in the usual process of commercial milling. (Adopted prior to 1928).

128. **Wheat Standard Middlings** consists mostly of fine particles of wheat bran, wheat germ, and very little of the fibrous offal obtained from the "tail of the mill." This product must be obtained in the usual commercial process of milling and must not contain more than 9.5 per cent of crude fibre. (Adopted prior to 1928).

129. **Wheat Flour Middlings** shall consist of wheat standard middlings and wheat red dog combined in the proportions obtained in the usual process of milling and must not contain more than 6.0 per cent of crude fibre. (Adopted prior to 1928).

130. **Wheat Red Dog** is a by-product obtained in the usual commercial process of flour milling, consisting principally of aleurone with small quantities of wheat flour and fine wheat bran particles and must not contain more than 4.0 per cent of crude fibre. (Adopted prior to 1928).

131. **Wheat Low-Grade Feed Flour** is a by-product obtained in the usual commercial process of flour milling, consisting principally of wheat flour with small quantities of aleurone and fine wheat bran particles and must not contain more than 1.5 per cent of crude fibre. (Adopted prior to 1928).

132. **Wheat Bran and Wheat Standard Middlings** consist of the two commodities as defined above, mixed in the proportions obtained in the usual process of commercial milling. (Adopted prior to 1928).

133. **Hard Wheat Mixed Feed** (mill-run wheat feed) consists of wheat bran and wheat flour middlings combined in the proportions obtained in the usual process of commercial milling. This product must not contain more than 9.5 per cent of crude fibre. (Adopted prior to 1928).

134. **Wheat Brown Shorts** (Wheat Red Shorts) consists mostly of the fine particles of wheat bran, wheat germ and very little of the fibrous offal obtained from the "tail of the mill." This product must be obtained in the usual commercial process of milling and must not contain more than 7.5 per cent of crude fibre. (Adopted prior to 1928).

135. **Wheat Gray Shorts** (Wheat Gray Middlings or Wheat Total Shorts) consists of the fine particles of the outer bran, the inner bran or bee-wing bran, the germ and the offal or fibrous materials obtained from the "tail of the mill." This product must be obtained in the usual process of commercial milling and must not contain more than 6.0 per cent of crude fibre. (Adopted prior to 1928).

136. **Wheat White Shorts or Wheat White Middlings** consists of a small portion of the fine wheat bran particles and the wheat germ and a large portion of the fibrous offal obtained from the "tail of the mill." This product must be obtained in the usual process of flour milling and must not contain more than 3.5 per cent of crude fibre. (Adopted prior to 1928).

137. **Wheat Mixed Feed** (mill-run wheat feed) consists of wheat bran and the gray or total shorts combined in the proportions obtained in the usual process of commercial milling. This product must not contain more than 8.5 per cent of crude fibre. (Adopted prior to 1928).

RESOLUTIONS ADOPTED

1. Resolved that it is the sense of this Association that we understand the term "Nitrogen Free Extract" to cover the product indicated by the percentage obtained by subtracting from 100 per cent the sum of the percentages of Ash, Moisture, Protein, Fat and Fiber. (Adopted prior to 1923).

2. Resolved that the term "carbohydrates" be interpreted to cover the product indicated by the percentage obtained by the addition of the percentages of crude fibre and nitrogen free extract. (Adopted prior to 1923).

3. Resolved that it is the sense of this Association that a ton of feed be 2,000 pounds, net. (Adopted prior to 1923).

4. Resolved that this Association go on record as opposing the use of second hand bags unless they are turned wrong side out so that the original stenciling will not be displayed. (Adopted prior to 1923).

5. Resolved that this Association go on record to the effect that the term cracked corn does not apply to degermed cracked corn. (Adopted prior to 1923).

6. Resolved that this Association go on record as condemning the practice of packing feedingstuffs in bags containing 99 pounds net and billing and charging for 100 pounds net. (Adopted 1923).

7. Whereas, Linseed Oil Meal is sold more or less on the basis of the protein content, as in the case of cottonseed meal, therefore.

Be it Resolved that the percentage of protein should be prefixed to linseed cake or meal, as is done with cottonseed meal, for example 34 per cent Protein Linseed Meal. (Adopted 1923).

8. Resolved that it is the sense of this Association that no product sold under a trade or proprietary name be recognized for the purpose of formulating definitions, standards, etc. (Adopted 1927).

9. Resolved that this Association go on record as condemning the use of the word vitamin in a bran name, and as opposing the acceptance of registration of feeds with this word in the brand name. (Adopted 1929).

10. Resolved: (a) That it is the sense of this Association that the names of feed materials or their combinations must not be misleading as to the kind, character and nature of the material or materials.

(b) That the name of each feed material should be stated in its simplest form and in the common English term, if such term exists, omitting all superfluous or ambiguous words.

(c) That if a descriptive name is used, the material must correspond thereto. (Adopted 1930).

11. Resolved that this Association go on record as disapproving any use of artificial colors in the manufacture of feedstuffs. (Adopted 1931).

12. Resolved that this Association go on record as condemning the use of any contraction of the word "vitamin," or any word suggesting vitamin in a brand name, and as opposing the acceptance of registrations of feeds under names which are in conflict with this resolution. (Adopted 1932).

13. Resolved that any material sold primarily as a vitamin D supplement for poultry shall be labeled with a minimum guarantee of anti-rachitic potency, specifying the minimum percentage level at which normal calcification is produced, according to the tentative method of analysis as adopted by the Association of Official Agricultural Chemists. Calcification shall be considered to be normal when the minimum tibia ash averages are 44 per cent. (Adopted 1933—Amended 1935).

14. Resolved that all tentative definitions should not be used until adopted as official, unless specified action of the Association is taken. (Adopted 1933).

15. Resolved that the Association of American Feed Control Officials, Inc., request the cooperation of all recognized feed manufacturing associations in submitting for approval any contemplated changes in definitions of feedingstuffs which in any way conflict with the official definitions as adopted by this organization.

It is also requested that wherever practicable any existing conflicting definitions be changed to conform to the official definitions. (Adopted 1934).

16. Whereas, many states which have adopted the Association's definitions for cottonseed products require that a guarantee of fat and crude fibre content in cottonseed meal be made, therefore, for the sake of uniformity of labels and registration, and in such cases where there is no conflict with existing feed laws,

Be it Resolved, that the following guarantee of fat and crude fibre be recommended:

	Crude Fat Not Less Than	Crude Fibre Not More Than
For 36% Protein Cottonseed Meal.....	4.50%	16.00%
For 41% Protein Cottonseed Meal.....	5.00%	13.00%
For 43% Protein Cottonseed Meal.....	5.25%	12.00%

(Adopted 1934)

17. Since the term "carbohydrates" is misleading and combines a maximum guarantee of crude fibre with a minimum guarantee of nitrogen free extract,

Be it Resolved, that the use of the term "carbohydrates" on the uniform registration blank and uniform tags be discontinued. (Adopted 1935).

FEED ANALYSES

- (A) Feed Definitions
- (B) General Feeds
- (C) Dog Foods
- (D) Mineral Mixtures
- (E) Assay of Vitamin D Supplements

The results obtained in the chemical and microscopical examination of feeds, dog foods, and mineral mixtures, are found on pages 52 to 135, the assays of vitamin D products immediately following. Feeds are considered seriously deficient as regards chemical analysis when they are one per cent or more deficient in protein, or one-half of one per cent deficient in fat.

ASSAY OF VITAMIN D SUPPLEMENTS SOLD IN MARYLAND Spring 1936

The accompanying table contains the results obtained in a recently completed assay of samples of products sold in Maryland as vitamin D supplements. These samples were secured by Inspectors of this Department during January and February 1936. Each brand tested carried a specific guarantee of vitamin D potency as measured by the Association of Official Agricultural Chemists' method of assay for anti-rachitic materials. This potency is listed in the table under the heading "Guaranteed Percentage." Each product was assayed at the guaranteed percentage and the results are shown in the column headed "Result of Test." If a product gave a group average ash percentage of 44% or more at the guaranteed percentage under the A. O. A. C. procedure, it is reported as "Guarantee Sustained." If the ash percentage was less than 44% the report is "Guarantee Not Sustained, Ash Percentage ????"

It is to be emphasized that the guaranteed percentages are not to be construed as feeding recommendations. For practical feeding purposes the recommendations of the manufacturer should be followed.

In order to derive the maximum benefits from the results of control assays, it is advisable to consider as great a number of tests as are available. The results of previous tests conducted by this Department will be of service in this connection.

Manufacturer	Brand Name	Guaranteed Percentage	Result of Test
The Acton Co., Philadelphia, Pa.	Acton Special Non-Freezing Cod Liver Oil	½%	Guarantee Sustained
F. E. Booth Co., Inc., San Francisco, Calif.	Sardilene	½%	Guarantee Sustained
California Packing Corp., San Francisco, Calif.	Biotol Biologically Tested Sardine Oil	¾%	Guarantee Sustained
Consumers Import Co., Inc., New York City, N. Y.	Deluxe, U.S.P. Cod Liver Oil	¼%	Guarantee Sustained
Ezl. Dunwoody Co., Philadelphia, Pa.	Super X Cod Liver Oil	½%	Guarantee Sustained
Gunning and Gunning New York City, N. Y.	Gunning-Quality Cod Liver Oil	1%	Guarantee Sustained
Health Products Corp., Newark, N. J.	CLO-TRATE Concentrated Cod Liver Oil	½%	Guarantee Sustained
Chas. L. Huisking and Co., New York City, N. Y.	High Hatchability Special Vitamine Brand Cod Liver Oil Reinforced with Vitamin E	¼%	Guarantee Sustained
	Vitamin Brand Cod Liver Oil	¼%	Guarantee Sustained
King Brothers and Co., Philadelphia, Pa.	King's Poultry Cod Liver Oil	½%	Guarantee Sustained
McKesson and Robbins, Inc., Bridgeport, Conn.	Isdahl's Superfine Poultry U.S.P.; Non- destearinated Cod Liver Oil	½%	Guarantee Sustained
Mutual Rending Co., Inc., Philadelphia, Pa.	Mureco Cod Liver Oil	1%	Guarantee Sustained
National Oil Products Co., Harrison, N. J.	†Nopco XX Vitamin Concentrate Added to Pure Cod Liver Oil	3/32%	Guarantee Sustained
	Nopco DD Cod Liver Oil	¾%	Guarantee Sustained
Pratt Food Co., Hammond, Ind.	Pratt's Cod Liver Oil	½%	Guarantee Sustained

*Now registered as "Nopco." †Now registered as "Nopco Cod Liver Oil."

In the table immediately following are given the results of two tests of a sample of Dunwoody Super X Cod Liver Oil which was collected by this Department in August 1935. The results of our first assay of this particular sample showed it to be less potent than guaranteed. A pen of chicks fed this oil at the guaranteed level of ½% gave an average tibia ash content of 38.07%. A portion of this same sample was retested at ½%. The ash average found in the second test was 37.33%, clearly substantiating the results of the original assay.

Manufacturer	Brand Name	Percentage Guaranteed	Result of Test
Ezl. Dunwoody Co., Philadelphia, Pa.	Super X Cod Liver Oil	½%	Guarantee not Sustained. First Test = 38.07% Retest = 37.33%

The report in Table 1 covers a sample of Ezl. Dunwoody Super X Cod Liver Oil taken this Spring and has no connection with the product reported in Table 2.

LIME ANALYSES

A detailed report of the results obtained in the inspection and analysis of agricultural liming materials from January 1, 1936, to June 1, 1936, is contained in pages 138 to 147, inclusive. Limes are considered seriously deficient with respect to chemical analysis when they are one per cent deficient in total oxides.
